

Project Profile

DeWitt Apartments | Salt Lake City, UT

DeWitt Apartments, nestled in the heart of Salt Lake City, installed over 80,000 sq. ft. of WrapShield SA Self-Adhered on a plywood substrate.

One of the standout advantages of WrapShield SA Self-Adhered from VaproShield is its unmatched self-adhered technology, which simplifies the installation process and ensures a tight, secure bond. This attribute played a pivotal role in accelerating the construction timeline for DeWitt Apartments, saving both time and labor costs. Additionally, WrapShield SA's robust weather resistance, 6 months UV and climate exposure, and its ability to repel moisture protected the building from the harsh climate conditions of Salt Lake City during construction.

The Specifications
