PRODUCT(S)

**WRAPSHIELD**<sup>®</sup> Water-Resistive Vapor Permeable Air Barrier Membrane

**WRAPSHIELD**<sup>®</sup> SA Self-Adhered Water Resistive Vapor Permeable Air Barrier Sheet Membrane

**REVEALSHIELD**<sup>™</sup> UV Stable Water Resistive Vapor Permeable Air Barrier Membrane

PROJECT DESCRIPTION

WrapShield, WrapShield SA Self-Adhered and RevealShield were installed on the 38 Harriet Apartments in San Francisco, which was one of the first prefab micro housing projects in the U.S. The apartments were built as modules in a factory, then transported to the job site and put up in just days. The project was completed in six months – from ground breaking to completion.

RevealShield was installed as part of an open joint rain screen system behind Parklex cladding. WrapShield was installed behind James Hardie<sup>®</sup> Commercial Board Siding Products.
