PRODUCT(S)
WRAPSHIELD[®] Water Resistive Vapor Permeable Air Barrier Sheet

ACCESSORIES
VAPROTAPE[™]
VAPROFLASHING[™]
VAPROSILLSAVER

PROJECT DESCRIPTION
Over 510,000 sq. ft. of WrapShield was installed on the Bridgeport Apartments located in Tualatin, Oregon. A mechanically attached, water resistive, vapor permeable air barrier, WrapShield features integrated tape at the horizontal seams. This component reduces installation time and material expenses without compromising quality. WrapShield's integrated tape seals horizontal seams in all weather conditions to eliminate water concerns at the horizontal joints.

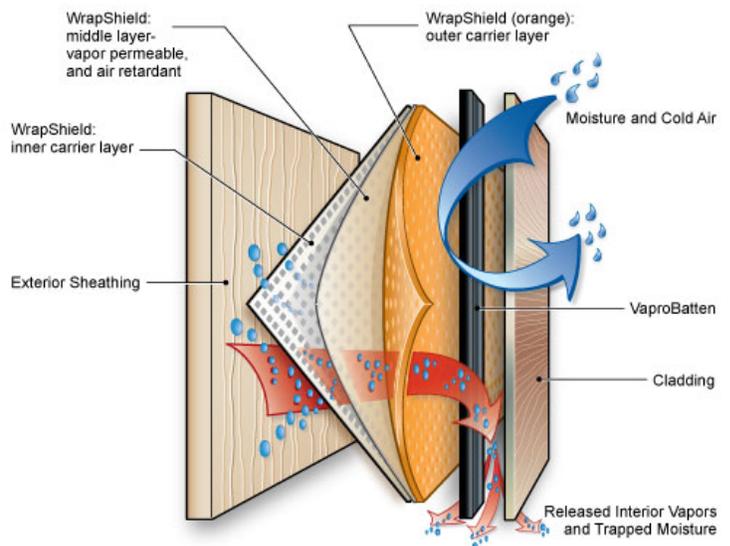

A 631,000 sq. ft. development, the Bridgeport Apartments were designed to articulate a sophisticated resort aesthetic. Built for consumers seeking to marry the urbanity of the downtown lifestyle with the convenience of the suburbs, the Bridgeport Apartments trusted their multi-million dollar investment with VaproShield. In addition to featuring half a million square feet of WrapShield, the Bridgeport Apartments were further secured using VaproFlashing and VaproTape on all rough openings. VaproSillSavers were applied to all window sills to provided added protection against water damage.

The Bridgeport Apartments trusted their multi-million dollar investment with WrapShield Water Resistive Vapor Permeable Air Barrier Sheet.
