Permeable Air Barrier Sheet  
**VAPROLIQUI-FLASH™** Vapor Permeable  
Liquid Applied Flashing  
**VAPROCAPS™**  
**VAPROFLASHING™**

PROJECT DESCRIPTION  
Over 19,900 sq. ft. of WrapShield was installed on Cherry Street. WrapShield utilizes a visible attachment matrix and built-in Integrated Tape to provide a consistent and nominal application. VaproLiqui-Flash Vapor Permeable Liquid Applied Flashing, VaproCaps and Dow Corning 758® Silicone Weather Barrier Sealant were applied around rough openings. The Cherry St. project featured a demanding construction site that included very tight working conditions.

The general contractor decided to go with the proven reliability of WrapShield. Tired of competitor wraps that required constant reattachment after ripping and tearing in windy weather, the general contractor was sold on WrapShield's tear resistant and all-weather installation readiness. WrapShield was the ideal choice for the Cherry St. project.

Over 19,900 sq. ft. of WrapShield was installed on the Cherry St. project located in Grand Rapids, MI.

A phased new construction and retrofit, the Cherry St. project will provide housing for the area community.
