

14,000 sq. ft of WrapShield SA Self-Adhered was installed on Zac Brown's Camp Southern Ground: Lodge One—an award-winning project located in the heart of Chattanooga, TN.

Shortly after a competitive product was installed on the camp's Dining Hall, substantial window leakage was discovered. Concerned about the possibility of repeating the problem, Metro Waterproofing sought the expertise of VaproShield in mitigating potential moisture-related issues for the next phase of the camp; Lodge One. Metro Waterproofing's bid using VaproShield was accepted over both a competitive sheet good (basis of design) and a fluid applied system.

WrapShield SA Self-Adhered was then installed under the guidance of VaproShield's technical team. Additionally, Metro Waterproofing worked in careful coordination with the glazer to install stainless steel angles out to the window dry line—the windows were tested to the ASTM E 331 standard and passed with no leakage.

VaproFlashing SA, Vapro Liqui-Flash, VaproBond, and Vapro-SS Flashing, were then utilized to flash the building's rough-openings, eliminating the need for untested third-party components and mitigating costly moisture damage. Kevin Meara of Metro Waterproofing praised VaproShield saying, "They provided us with superior support to combat a difficult and unpersuadable waterproofing consultant."

## The Specifications

VaproShield Solution	WrapShield SA® VaproFlashing SA® Self-Adhered Vapro-SS Flashing™ VaproLiqui-Flash™ VaproBond™
Size	51,000 sq.ft.
Architect	Perkins+Will   Atlanta, GA <a href="http://www.perkinswill.com">www.perkinswill.com</a>
General Contractor	DPR and Structor Group Joint-Venture   Atlanta, GA <a href="http://www.dpr.com">www.dpr.com</a>
Installer	Metro Waterproofing   Atlanta, GA
