PRODUCT(S)

**WALLSHIELD®** *Water Resistive Barrier Sheet*

PROJECT DESCRIPTION

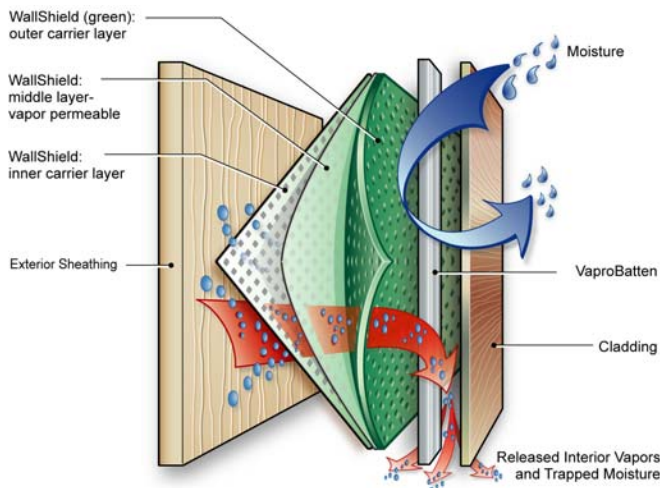

Over 30 stories of the Hartford Civic Center also known as Town Square, a retail and office tower in Hartford Connecticut, were covered in VaproShield WallShield Water Resistive Barrier Sheet.

VaproShield offers specific installation fastener spacings for structures between 70 to 625 feet in height, differentiated by exposure, building category, fixing types and wind speeds.

WallShield was chosen because it can be installed on high rise structures and it is the most vapor and air permeable weather resistant membrane in the industry. With a rating of 212 perms, WallShield allows trapped interior moisture to escape, reducing the risk of mold, mildew and rot.

Over 30 stories of the Hartford Town Square were covered in VaporShield WallShield Water Resistive Barrier Sheet.

WallShield membrane construction
