

Durable, Sustainable Wood Substrates

Weatherproof, WRB/Air Barrier Protection

WrapShield SA Self-Adhered water resistive (WRB), vapor permeable air barrier sheet membrane offers exceptionally high drying capacity. Helping to dry-out moisture laden wood substrates.

- Ideally suited for wood substrates, easy to apply with snap fit construction, ability to reposition within 30 minutes, 100% self-adhered membrane requires no primer.
- Provides weatherproofing and protection for CLT (cross laminated timber) panels during construction.
- Supports healthy building performance; environmentally friendly, zero VOC's, Red List Free*, 100% recyclable just like Mother Nature's wood.

*WrapShield SA Self-Adhered does not contain any Red List ingredients as per the Living Building Challenge and participates in the Declare Program.

Try it for yourself. Order samples today at VaproShield.com or contact our Technical Team at 866-731-7663 opt. 5

Air tight and breathable just like a frog's skin, delivering energy savings and building envelope protection

Offers Class A fire protection in both flame spread and smoke developed indices

High drying capacity, drastically reduces incidence of mold, mildew and wood rot especially around rough openings

VAPROSHIELD®
Breathable Membrane Systems for Roofs & Walls
