**PRODUCT(S)**

**REVEALSHIELD SA® SELF-ADHERED UV  
Stable Water Resistive Vapor Permeable Air  
Barrier Membrane**

**PROJECT DESCRIPTION**

Over 10,000 sq.ft. of RevealShield SA Self-Adhered Water Resistive Vapor Permeable Air Barrier Sheet Membrane was installed over USG gypsum sheathing on the Holland Energy Park. Revealshield SA Self-Adhered is black, UV stable and creates the desired black reveal behind open-joint cladding.

The general contractor chose VaproShield for its reliability, fast application process, no VOC's and the 20 year warranty against UV degradation.

The unique park like setting for this combined cycle natural gas plant features paths, waterfalls and natural greenery. This innovative project is the first power plant to achieve Envision Platinum Verification.

Over 10,000 sq.ft. of RevealShield SA Self-Adhered (black) was installed on the Holland Energy Park.

RevealShield SA Self-Adhered creates the desired black reveal and UV stability behind the open joint cladding.

RevealShield SA Self-Adhered was installed over USG gypsum sheathing.
