

Step 1: Buck Framed Window RO Flashing System

VAPROLIQUI-FLASH™

Step 1: Inspect rough opening, clear of debris

PRODUCT DESCRIPTION

VaproLiqui-Flash is a liquid applied, vapor permeable, waterproof, air barrier flashing system component for window and door rough openings. VaproLiquiFlash is designed to work with VaproFlashing and VaproShield field membranes as a complete system.

DISCLAIMER

Detail sketch is generic, representing suggested best practices for VaproShield materials, and does not represent a specific job site condition and therefore may not be applicable to certain projects. Detail sketch is designed for use as a reference and must be approved by the designer/ consultant of record for each project prior to installation by the subcontractor. Changes and approvals of VaproShield details are the sole responsibility of the designer/consultant of record. VaproShield is **not** the designer of record for building enclosure details and takes no responsibility for the accuracy or interpretation of actual project site conditions.

Step 2: Buck Framed Window RO Flashing System

VaproFlashing SA Self-Adhered properly shingled; applied directly to sheathing + folded onto bottom of buck frame.

Note: Total of 11.75" of flashing should be used:

- 9" of flashing should be left on the face of the sheathing
- 6" of release film from the bottom of the flashing to be left attached for shingling over membrane.

VAPROLIQUI-FLASH™

Step 2: Install VaproFlashing SA onto sill, extending onto bottom of buck frame. 9" left on face, with bottom 6" of release film to remain attached.
