1.) WrapFlashing SA Self-Adhered Sill Piece applied directly to sheathing + folded 2.75" inside of R.O. *Release film left on lower 6" to shingle over field membrane

2.) WrapFlashing SA Self-Adhered Jamb Pieces applied directly to sheathing + folded 2.75" inside of R.O.

3.) WrapFlashing SA Self-Adhered Sill Pieces applied directly to sheathing + folded 2.75" inside of R.O.

4.) VaproBond @ inside rough opening + 1" on face, 30 mils on sill, 15 mils on jamb and head.

5.) Head flashing (by others) over VaproBond embedded in VaproBond

6.) VaproAirSeal + backer rod (by others)

Note: Interior sealant joint required around entire perimeter of window for proper air barrier continuity and water holdout.

PRODUCT DESCRIPTION
VaproBond™ is a single component 100% silicone adhesive sealant used to bind layers of VaproShield membranes to each other or typical construction material surfaces. It simplifies the process of producing watertight, airtight details.

DISCLAIMER
Detail sketch is generic, representing suggested best practices for VaproShield materials, and does not represent a specific job site condition and therefore may not be applicable to certain projects. Detail sketch is designed for use as a reference and must be approved by the designer/consultant of record for each project prior to installation by the subcontractor. Changes and approvals of VaproShield details are the sole responsibility of the designer/consultant of record. VaproShield is not the designer of record for building enclosure details and takes no responsibility for the accuracy or interpretation of actual project site conditions.
