

## Project Profile

## 400 W Elm | Conshohocken, PA

More than 100,000 square feet of PanelShield SA was installed on the new 400 W. Elm apartment complex, comprising 345 units in Conshohocken, PA. PanelShield SA proved to be an excellent selection due to its ability to withstand 12 months of UV and climate exposure for the large 445,000 sq.ft project. Additionally, PanelShield SA boasts primerless installation and zero VOC exposure making it safe for crews to install without expensive protective gear. When installed as a continuous air barrier PanelShield SA will help to improve indoor air quality and lower energy expenses for occupants.

The 13-story building will sit on 10.5 acres in the Borough of Conshohocken. Residents will enjoy amenities ranging from a clubhouse, fitness center, a courtyard with outdoor cooking features, an elevated swimming pool deck, and a rooftop with unbeatable views of Conshohocken, the Schuylkill River, and surrounding neighborhoods.
