

# Project Profile

Retail Headquarters | AR

Over 600,000 sq.ft. of SlopeShield Plus SA is being installed on the mass timber substrate at a retail headquarters in Arkansas. The choice of SlopeShield Plus SA for this project underscores its myriad benefits. Beyond its primary function of moisture management, through moisture vapor diffusion, SlopeShield Plus SA boasts easy installation, reducing construction time and costs. Its self-adhered nature ensures a secure and reliable seal over the mass timber substrate and splines. Moreover, SlopeShield Plus SA offers superior UV resistance, mitigating the effects of prolonged exposure to sunlight and helps to maintain mass timber integrity. SlopeShield Plus SA emerges as a trusted solution for mass timber construction challenges, aligning with the vision of the retail headquarters project in Arkansas. After construction SlopeShield Plus SA will help to enhance energy efficiency by blocking air infiltration, further contributing to a green footprint.
