**PRODUCT(S)**

**WRAPSHIELD SA**<sup>®</sup> SELF-ADHERED Water Resistive Vapor Permeable Air Barrier Sheet Membrane

**PROJECT DESCRIPTION**

Over 14,000 sq. ft. of WrapShield SA Self-Adhered Water Resistive Vapor Permeable Air Barrier Sheet Membrane was installed in the construction of a state-of-the-art Audi Dealership in Broomfield, Colorado.

WrapShield SA is free of VOCs and does not require the use of primers. This feature proved invaluable to both the residents of Broomfield and visitors to the adjacent Flatiron Mall, as workers were able to safely install the building wrap without fear of exposing people or the environment to red list chemicals.

WrapShield SA Self-Adhered was installed over gypsum sheathing and cement block to provide the building envelope with durable, breathable protection. Ideal for tight timelines, WrapShield SA is entirely self-adhering, does not require primers, and can be easily installed in most weather conditions. This versatility met the project's objectives and made installation efficient.

Installers use basic handtools to efficiently install WrapShield SA Self-Adhered (orange) over over cement block and gypsum sheathing. The packaging box serves as a dispenser.

WrapShield SA Self-Adhered does not require any primer, and crews are always safe around the product as it emits zero VOC's and contains no red list chemicals.
