PRODUCT(S)
WrapSHIELD[®] and **WallShield**[®]

PROJECT DESCRIPTION
WrapShield combined with VaproBatten and Rain Screen Design Components were used on Epic Corporations Building K. The project features 100,000 ft² of WrapShield on Building K, a three-story, 171, 866 ft² building that houses 415 offices and the central energy plant that serves all of Campus 2.

WrapShield, with a rating of 50 perms, combines the best properties of a vapor permeable membrane and an air barrier in one innovative product. It is compatible with multiple types of cladding, sustains up to 9 months of UV and climate exposure. Critical features for the ever-changing Wisconsin weather.

Epic Corporate Campus 1 and 2 has been a multi-phase building project. During earlier construction, over 150,000 ft² of WallShield was installed.

WrapShield combined with VaproBatten and Rain Screen Design Components were used on Epic Corporations Building K.
