PRODUCT(S)
WallSHIELD®

PROJECT DESCRIPTION
VaproShield WallShield was installed on three buildings in the Cicero Municipal Complex: Village Hall, Police Station, and the Cicero Youth Center. The complex combines masonry, metal and Trespa rain screen panels with over 44,000 ft2 of WallShield behind the eclectic cladding sections.

The 126,000 ft2 \$58M construction project was completed in 2008. The Town of Cicero is one of the oldest and largest municipalities in the State of Illinois. The town president Larry Dominick's prominent reason for the new Municipal Center was to offer more family friendly space for the community.

The Municipal Complex project features over 44,000 ft2 of WallShield

WallShield was installed behind 44,000 ft2 of Trespa.
