PRODUCT(S)  
**WrapSHIELD<sup>®</sup> Black**

PROJECT DESCRIPTION  
Over 2000 s/f of WrapShield Black was used on the renovation project for KZF Architect's new office building. All 36,000 s/f of the building was renovated and, with its new products and features, reaches LEED silver certification. The project wrapped up in early spring of 2010.

The WrapShield was chosen as a weather barrier, to go behind the Trespa façade system, because of the 50 perm rating combined with the best properties of a vapor permeable membrane and air barrier in one product.

*The building, originally built in 1915, was completely renovated in early 2010.*

*2000 s/f of WrapShielded Black was installed behind Trespa Meteon.*
