PRODUCT(S)

WALLSHIELD® Water Resistive Barrier Sheet

PROJECT DESCRIPTION

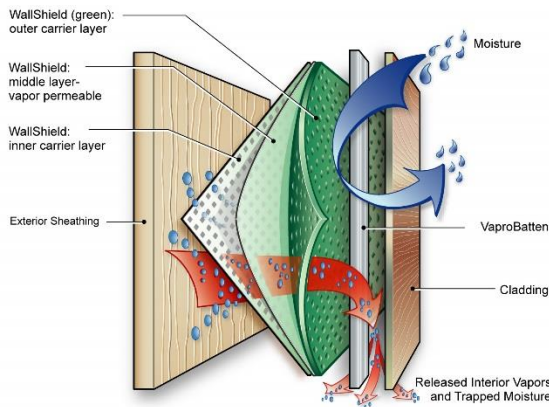

Approximately 3,200 sq.ft. of WallShield Water Resistive Barrier Sheet was installed on this private residence in Portsmouth, NH. The owner was looking to maintain water tightness during the renovation of this coastal residence. He also wanted to extend the life of the new cedar siding by promoting breathability.

The approximately 300 year old house, was moved to its current location in 1820 from the waters edge just down the street. It used to serve as a fish fileet house and received fish from the master sailing ships that brought in Cod and Haddock.

After the renovation, with the combination of WallShield and rain screen construction, the homeowner’s heating bill was cut in half during the coldest month of the year.

WallShield Water Resistive Barrier Sheet offers:

- Secondary Rain Barrier
- Zero VOC's, (no off-gassing)
- Low Temperature Applications
- Fire Rated, Class A to ASTM E 84
- 6 Months UV & Climate Exposure
- High Temperature Resistance
- Tough, Durable, Tear Resistant
- Cinches around Fasteners
- Contributes to LEED points

3,200 sq.ft. of WallShield Water Resistive Barrier Sheet was installed on this coastal home in New Hampshire.

The homeowner is attributing the extended life of the cladding directly to WallShield.
