PRODUCT(S)

WRAPSHIELD SA[®] SELF-ADHERED Water Resistive Vapor Permeable Air Barrier Sheet Membrane

PROJECT DESCRIPTION

Over 60,000 sq.ft. of WrapShield SA Self-Adhered was installed on the 12-story Webster Square Condominiums in the Lincoln Park neighborhood of Chicago, IL. This project is a redevelopment of the former Lincoln Park Hospital.

WrapShield SA Self-Adhered was an ideal choice for the challenging revitalization project located in a tight, urban space. Unlike competitors, WrapShield SA is completely self-adhering requiring no spraying, protecting nearby pedestrians and walkers.

WrapShield SA Self-Adhered is phase construction friendly and easily installed in the variant, windy weather conditions of Chicago. It requires no primer or pre-joint/corner treatment, and crews are always safe around the product as it emits zero VOC's and contains no red list chemicals.

The building features 30 unique floor plans, balconies, high-end amenities and phenomenal city and lake views.

WrapShield SA Self-Adhered WRB/Air Barrier (orange) was installed on the Webster Square Condos in Chicago, IL.

WrapShield SA Self-Adhered is phase construction friendly and easily installed in the variant, windy weather conditions of Chicago. .
