**PROJECT DESCRIPTION**

The Willits Parcel 4C Town homes in Basalt, Colorado, which lies in the Aspen Valley, feature 10,000 sq. ft. of RevealShield UV Stable Water Resistive Vapor Permeable Air Barrier Membrane, as well as VaproLiqui-Flash Waterproof Flashing Material and RevealFlashing on building openings. These products create a complete system of components, saving valuable installation time, reducing contractor liability, and offering more design opportunities, such as the wood slat open joints featured on the project.

The Willits area is a growing part of Basalt, CO featuring family friendly neighborhoods with parks, playgrounds, shops, and businesses. The Parcel 4C Townhomes are also located near world class ski resorts and hiking trails.

Over 10,000 sq.ft. of RevealShield UV Stable Water Resistive Vapor Permeable Air Barrier Membrane was installed on the Willits Parcel 4C Town homes in Basalt, Colorado.

RevealFlashing Pre-Cut Flashing Membrane and VaproLiqui-Flash components were used to flash window and door rough openings.
