PRODUCT(S)

WRAPSHIELD SA[®] SELF-ADHERED Water Resistive Vapor Permeable Air Barrier Sheet Membrane

VaproFlashing
VaproLiquiFlash

PROJECT DESCRIPTION

After originally specifying a competitor, the architect chose WrapShield SA Self-Adhered to reduce costs and install to rigorous ASTM E2357 standards. Over 60,000 sq.ft. of WrapShield SA Self-Adhered Water Resistive Vapor Permeable Air Barrier Sheet Membrane was installed on the luxury mixed-use building behind multiple cladding types including copper, stucco, natural cedar and stone.

VaproLiquiFlash was also used as a liquid applied waterproof, breathable flashing material for window and door interfaces.

The Lion (formerly known as Strata) consists of 1.5 acres including 65 luxury condos and 7,000 sq.ft. of retail space, built on the site of the former Lionshead Inn.

Over 60,000 sq.ft. of WrapShield SA Self-Adhered was installed behind multiple cladding types including copper, stucco, natural cedar and stone during the winter months.

VaproLiquiFlash was used as a liquid applied waterproof flashing material for window and door interfaces.

Rendering by Oz Architecture highlighting the multiple cladding types.
