PROJECT DESCRIPTION

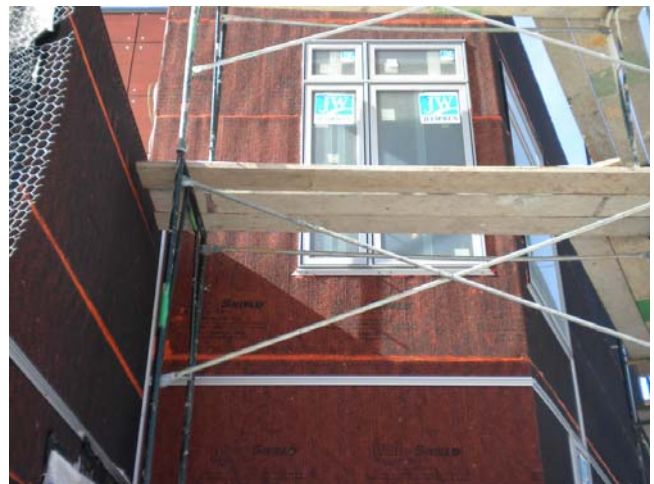

The multi-family residence in Vail, Colorado used a combination of 22,000 ft² of WrapShield HS under stucco to back drain and vent and over 9,000 ft² of WrapShield under exterior decorative cladding.

WrapShield, with a rating of 50 perms, combines the best properties of a vapor permeable membrane and an air barrier in one innovative, affordable product.

WrapShield bonded to HomeSlicker creates WrapShield HS. A unique water resistant membrane creating the necessary airspace in a rain screen wall system.
