**WallShield Flashings (Black)**

PROJECT DESCRIPTION

Over 15,000 sq. ft. of WallShield and WallShield Flashing was used on the Vestas Tower Assembly Plant. WallShield was chosen as the weather resistive barrier behind an open joint rainscreen system for its rating of 212 perms, making it the most vapor and air permeable weather resistant membrane in the industry.

Vestas is the largest producer of wind turbines in the world, and the \$250M, 600,000 sq. ft. assembly plant makes it the largest wind tower manufacturing facility in the world.

*Largest wind tower manufacturing facility in the world.*

*Over 15,000 sq/ft of WallShield was used.*

*Up close of WallShield used with Black Flashings.*
